Attorney Docket No. 52493.000127LISTING OF THE CLAIMS:

A listing of the status of the claims in the present patent application is provided below, which replaces all prior listings.

1. **(Currently amended)** A method for providing state specific sales-related data relating to insurance, over a network, the sales related data being forwarded from a supplier to a broker and being customized for the broker, the method comprising the steps of:

accessing at least one web page of a broker by inputting a broker network address;

receiving, at a supplier by a computer device, a request for sales-related data from a user associated with a broker, the request for sales related data being transmitted from the broker network address of the broker, the broker network address being utilized for the transmission of the request for sales-related data;

accessing broker information, at the supplier by the computer device, using the broker network address to retrieve broker information from a broker information database of the supplier;

displaying, to the user, at least a portion of the broker information with at least a portion of insurance related information;

receiving, at the supplier by the computer device, request-related information from the user;

accessing state related information, at the supplier by the computer device, that includes at least one of the user's state of residence and the state in which the broker is licensed; and

generating the sales-related data, at the supplier by the computer device, based on the received request-related information and based on the state related information.

U.S. Patent Application No.: 09/788,646  
Attorney Docket No. 52493.000127

2. (Original) The method of claim 1 further comprising the steps of:  
asking the user to select the user's state of residence; and  
receiving the user's state of residence selection,  
wherein the step of generating the sales-related data includes the sub-step of determining  
the sales-related data to generate based on the user's state of residence selection.

3. (Original) The method of claim 2 further comprising the steps of:  
receiving a request from the user to send an email to a broker;  
transmitting an email to a first email address of the broker if the user's state of residence  
selection corresponds to a state in which the broker is licensed to do business; and  
transmitting an email to a second email address of the broker if the user's state of  
residence selection does not correspond to a state in which the broker is licensed to do business.

4-6. (Canceled)

7. (Original) The method of claim 1 wherein the step of receiving the request-  
related information from the user includes receiving at least one of a date of birth, a state of  
residence, a height, a weight, a gender, a type of product desired, and a county of citizenship.

8. (Original) The method of claim 1 further comprising the step of determining the  
sales-related data based on the received request-related information.

9-11. (Canceled)

U.S. Patent Application No.: 09/788,646  
Attorney Docket No. 52493.000127

12. (Original) The method of claim 1 further comprising the step of requesting the request-related information from the user and returning an error message if the user fails to appropriately provide any portion of the request-related information.

13. (Original) The method of claim 1 further comprising the step of requesting the request-related information from the user and returning the user to a request-related information form if the user fails to appropriately provide any portion of the request-related information.

14. (Currently Amended) The method of claim 1 further comprising the step of determining an eligibility of the user from the request-related information and displaying a decline message if the request-related information indicates that the user is not eligible to purchase any one of a plurality of ~~the~~ available products.

15. (Canceled)

16. (Original) The method of claim 1 wherein the broker information comprises broker contact information.

17-20. (Canceled)

21-35. (Canceled)

U.S. Patent Application No.: 09/788,646  
Attorney Docket No. 52493.000127

36-52. (Canceled)

53. (Previously presented) The method of claim 1, the broker network address is a URL.

54. (Currently amended) A method for providing state specific sales-related data relating to insurance, over a network, the sales related data being forwarded from a supplier to a broker and being customized for the broker, the method comprising the steps of:

receiving, at a supplier by a computer device, a request for sales-related data from a user associated with a broker, the request for sales related data input from a broker network address of the broker, the broker network address being utilized to submit the request for sales-related data;

accessing, by the computer device, broker information from a broker information database based on the broker network address;

displaying, to the user, at least a portion of the broker information with at least a portion of insurance related information;

receiving, by the computer device, request-related information from the user;

accessing, by the computer device, state related information that includes at least one of the user's state of residence and the state in which the broker is licensed; and

generating the sales-related data, by the computer device, based on the received request-related information and based on the state related information; and

the method further comprising the steps of:

asking the user to select the user's state of residence; and

receiving the user's state of residence selection,

U.S. Patent Application No.: 09/788,646  
Attorney Docket No. 52493.000127

wherein the step of generating the sales-related data includes the sub-step of  
determining the sales-related data to generate based on the user's state of residence  
selection; and

the method further comprising the steps of:

receiving a request from the user to send an email to a broker;

transmitting an email to a first email address of the broker if the user's state of  
residence selection corresponds to a state in which the broker is licensed to do business; and

transmitting an email to a second email address of the broker if the user's state of  
residence selection does not correspond to a state in which the broker is licensed to do business.

55. (Canceled )

56. (Currently amended) A method for providing state specific sales-related data  
relating to insurance, over a network, the sales related data being forwarded from a supplier to a  
broker and being customized for the broker, the method comprising the steps of:

accessing at least one web page of a broker by inputting a broker network address;

receiving, at a supplier, by a computer device, a request for sales-related data from a user  
associated with a broker, wherein the request for sales related data is transmitted from the at least  
one web page of the broker having the broker network address;

retrieving broker information from a broker information database located at the supplier  
based on the broker network address;

displaying, to the user, at least a portion of the broker information with at least a portion  
of insurance related information;

U.S. Patent Application No.: 09/788,646  
Attorney Docket No. 52493.000127

receiving, at the supplier by the computer device, user information associated with the sales-related data;

determining, at the supplier by the computer device, one or more parameters for the sales-related data based on the user information;

accessing state related information, at the supplier by the computer device, wherein the state related information comprise at least one of the user's state of residence and a state in which the broker is licensed; and

generating the sales-related data, at the supplier by the computer device, based on the received user information, the one or more parameters, and on the state related information, the generating the sales-related data constituted by generation of a further web page containing the sales-related data.

57. (Previously presented) The method of claim 56, wherein determining, at the supplier, one or more parameters for the sales-related data based on the user information comprises determining a risk class associated with the user based on the user information.

58. (Previously presented) The method of claim 56, the broker network address is a URL.
